VNF	ISOLATOR BATTERY

This decoder allows free checking (decoding) information about equipment factory Opel (Vauxhall) cars. VIN can be found on the post passenger, on the windshield on the driver side or under the floor mat on the

passee ^

It consists of 17 characters, and **has never letters I (i), O (o) and Q (q)** - in order to avoid confusion with the numbers 0 and 1.

For vehicles manufactured by General Motors VIN begins with the characters W0L. While for Astra H VIN begins with the characters: **W0L0AH**.

The decoder is available only for cars Opel (Vauxhall) - especially for the Astra H. In other models, some features may not be recognized.
